

Delta Neu's commitments towards sustainable development

Reducing carbon emissions

Delta Neu undertakes to carry out a carbon inventory every year, with the aim of reducing emissions by 20% in 2020 (compared to 2007) in accordance with European commitments.

Energy consumption

Delta Neu has started analysing the heating system for its production workshop in order to favour reduced energy consumption.

Optimised deliveries

Delta Neu has set up an optimised equipment delivery system to reduce carbon emissions due to transport.

Eco-responsible installations

Delta Neu undertakes to train its employees to take the energy consumption of our facilities into consideration at every stage of a project.

Delta Neu undertakes to incorporate new products, such as Natural and Economical Air Conditioning, in its facilities to reduce its energy footprint.

Delta Neu also undertakes to design installations with the maximum possible consideration for their integration into the landscape.

Eco-design of equipment

Delta Neu undertakes to design products:

- Accompanied by the implementation of an eco-design policy in an ecological approach ensuring recycling at the end of product life.
- Using either recyclable or biodegradable packaging, or packaging with a limited environmental impact on disposal.

Environmentally friendly production

Delta Neu undertakes to sort its production waste to favour recycling or clean disposal.

Clean and secure works

Delta Neu undertakes to follow a monthly customer satisfaction objective based on cleanness and security criteria on the works

Optimised travel

Delta Neu undertakes to favour:

- Organising conference calls by telephone and videoconferencing.
- Travel by rail instead of by air.
- A fleet of company vehicles with an optimised energy footprint.

Internal awareness actions

Delta Neu undertakes to increase awareness among its personnel concerning:

- Electricity consumption
- Paper consumption
- Double-sided printing
- The sorting of waste

Delta Neu undertakes to use PEFC-Certified paper when printing its documents, to support the sustainable management of forests.
